

Guillermo Segura

Full-stack Engineer

April 5, 2024

To Whom It May Concern,

I am writing to express my keen interest in the Full-stack Software Engineer advertised on Seek. With nearly five years of experience as a Full-stack Engineer, I am enthusiastic about contributing my skills to your team.

Over the past five years, I have developed solid foundations in creating and maintaining React and TypeScript applications and building the API that fed the data to the front end, relying on Laravel, PHP, and MySQL. Additionally, I am familiar with the design processes and iterations required to turn an idea into a deliverable product: I have participated actively in many design sprints and led initiatives that improved the quality of life of our users.

I was born in Ecuador, raised in Spain, and I am currently living in the UK. This background has equipped me with diverse skills such as adaptability, problem-solving, and teamwork, which have helped me throughout my professional journey. Additionally, my creativity and attention to detail have helped me foresee potential roadblocks and suggest alternatives in the multiple initiatives I have worked on.

At the moment, I am finalising details for relocating to New Zealand as this experience will help me grow professionally and personally. For this, I am working with experienced consultants so that you can rest assured of my commitment to this relocation. You will find more details in the support letter attached to my CV.

Thank you for considering my application. I look forward to discussing how my skills and experiences could align with your client's needs.

Yours sincerely,

Guillermo Segura
